Board of Managers J.V.B. Financial Group, LLC

We have audited the accompanying statement of financial condition of J.V.B. Financial Group, LLC (a Delaware Limited Liability Company) (the "Company") as of December 31, 2014, and the related statements of operations, changes in member's equity, and cash flows for the year then ended that are filed pursuant to Rule 17a-5 under the Securities Exchange Act of 1934. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of J.V.B. Financial Group, LLC as of December 31, 2014, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

The information contained in Schedule 1 has been subjected to audit procedures performed in conjunction with the audit of the Company's basic financial statements. Such supplementary information is the responsibility of the Company's management. Our audit procedures included determining whether the information reconciles to the basic financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and

accuracy of the information presented in Schedule 1. In forming our opinion on the supplementary information, we evaluated whether the information, including its form and content, is presented in conformity with Rule 17a-5 under the Securities Exchange Act of 1934. In our opinion, the supplementary information referred to above is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

#### 1. COMPANY AND FORMATION

J.V.B. Financial Group, LLC F/K/A C&Co/PrinceRidge, LLC (the "Company") is a wholly-owned limited liability company of J.V.B. Financial Group Holdings, LP F/K/A PrinceRidge Holdings LP (the "Parent").

The Parent is a wholly-owned subsidiary of IFMI, LLC (the "Operating LLC"), which is a majority owned subsidiary of Institutional Financial Markets, Inc. ("IFMI").

The Company is a Delaware Limited Liability Company. The Company is a broker-dealer registered with the Securities and Exchange Commission (SEC) and a member of the Financial Industry Regulatory Authority (FINRA). Additionally, the Company is a member of the Securities Investor Protection Corporation (SIPC).

The Company's customers are predominately institutional investors including brokers and dealers, commercial banks, asset managers, hedge funds and other financial institutions. The Company clears its transactions through clearing brokers on a fully disclosed basis. The Company is exempt from Rule 15c3-3 of the Securities and Exchange Commission under paragraph k(2)(ii) of that rule.

#### 2. BASIS OF PRESENTATION

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America ("U.S. GAAP").

The Company has evaluated subsequent events through the date and the time the financial statements were available to be issued on February 27, 2015.

On January 31, 2014, JVB Financial Group L.L.C. ("Old JVB") merged with the Company. Old JVB was a registered broker-dealer and was wholly owned by the Operating LLC. In conjunction with the merger, Old JVB withdrew its broker-dealer license with FINRA and legally merged into the Company (which was named C&Co/PrinceRidge, LLC at the time). Also in conjunction with the merger, the Company changed its name to J.V.B. Financial Group, LLC.

Because both Old JVB and the Company were under common control of the Operating LLC, this combination was treated as a combination of entities under common control as described in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 805 Business Combinations. Accordingly, these financial statements are presented treating the merger as if it was effective on January 1, 2014. All material inter-company transactions have been eliminated. All assets and liabilities were transferred at their carrying values and no gain, loss, or goodwill was recorded.

#### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### A . Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make assumptions and estimates that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

#### B. Cash and Cash Equivalents

Cash and cash equivalents consist of cash and short-term, highly liquid investments that have original maturities of three months or less. The Company maintains deposits in excess of federally insured limits and maintains funds in short term investment accounts that are not covered by federal insurance. However, management believes that the Company is not exposed to significant credit risk due to the financial position of the depository institutions in which these cash and cash equivalents are held. To date, the Company has not experienced any losses on cash and cash equivalents.

#### C. Receivables and Payables to Brokers, Dealers, and Clearing Agencies

The Company clears all of its securities transactions, other than collateralized securities transactions, with Pershing, LLC. For its collateralized securities transactions, it clears through Newedge USA LLC.

Receivables from brokers, dealers and clearing agencies consist of the following: (i) deposits with the Company's clearing brokers, to support the Company's securities trading activities and (ii) net settlement receivables for securities sold and trades made with various counterparties that had not settled at December 31, 2014. The receivables are short term in nature. Payables to brokers, dealers and clearing agencies consist of the margin payable with the Company's clearing broker. These payables are short term in nature. See note 4.

#### D. Financial Instruments

The Company accounts for its investment securities at fair value under various accounting literature including FASB Accounting Standards Codification ("ASC") 320, Investments — Debt and Equity Securities ("FASB ASC 320"), pertaining to investments in debt and equity securities and the fair value option of financial instruments in FASB ASC 825, Financial Instruments ("FASB ASC 825").

Certain of the Company's assets and liabilities are required to be measured at fair value. For those assets and liabilities, the Company determines fair value according to the fair value measurement provisions included in FASB ASC 820, Fair Value Measurements and Disclosures ("FASB ASC 820"). FASB ASC 820 establishes a single authoritative definition of fair value, sets out a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and requires additional disclosures about fair value measurements. The definition of fair value focuses on the price that would be received to sell the asset or paid to transfer the liability between market participants at the measurement date (an exit price). An exit price valuation will include margins for risk even if they are not observable. FASB ASC 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels ("level 1, 2 and 3").

FASB ASC 320 requires that the Company classify its investments as either (i) held to maturity, (ii) available for sale, or (iii) trading. This determination is made at the time a security is purchased. FASB ASC 320 requires that both trading and available for sale securities are to be carried at fair value. However, in the case of trading assets, both unrealized and realized gains and losses are recorded in the statement of operations. For available for sale securities, only realized gains and losses are recognized in the statement of operations while unrealized gains and losses are recognized as a component of other comprehensive income.

In the period presented, all securities were either classified as trading or available for sale. No securities were classified as held to maturity. Furthermore, the Company elected the fair value option, in accordance with FASB ASC 825, for all securities that were classified as available for sale. Therefore, for the period presented, all securities owned by the Company were accounted for at fair value with unrealized and realized gains and losses recorded in the statement of operations.

All securities that are classified as trading are included in investments-trading. However, when the Company acquires an investment that is classified as available for sale, but for which the Company elected the fair value option under FASB ASC 825, the investment is classified as other investments, at fair value.

The determination of fair value is based on either quoted market prices of an active exchange, independent broker market quotations, market price quotations from third party pricing services, or, when independent broker quotations or market price quotations from third party pricing services are unavailable, valuation models prepared by the Company's management. These models include estimates and the valuations derived from them could differ materially from amounts realizable in an open market exchange.

#### Investments-trading

Unrealized and realized gains and losses on securities classified as investments-trading are recorded in net trading in the statement of operations. See note 5.

Other Investments, at fair value

All gains and losses (unrealized and realized) from securities classified as other investments, at fair value in the statement of financial condition are recorded as a component of principal transactions and other income in the statement of operations. See note 5.

Trading Securities Sold, Not Yet Purchased

Trading securities sold, not yet purchased represent obligations of the Company to deliver the specified security at the contracted price, thereby creating a liability to purchase the security in the market at prevailing prices. The Company is obligated to acquire the securities sold short at prevailing market prices, which may exceed the amount reflected on the statement of financial condition. Unrealized and realized gains and losses on trading securities sold, not yet purchased are recorded in net trading in the statement of operations. See note 5.

#### E. Derivative Financial Instruments

FASB ASC 815, Derivatives and Hedging ("FASB ASC 815"), provides for optional hedge accounting. When a derivative is deemed to be a hedge and certain documentation and effectiveness testing requirements are met, reporting entities are allowed to record all or a portion of the change in the fair value of a designated hedge as an adjustment to other comprehensive income ("OCI") rather than as a gain or loss in the statements of operations. To date, the Company has not designated any derivatives as hedges under the provisions included in FASB ASC 815.

Derivative financial instruments are recorded at fair value. If the derivative was entered into as part of its broker-dealer operations, it will be included as a component of investments-trading or trading securities sold, not yet purchased. If it is entered into to a hedge for another financial instrument included in other investments, at fair value then the derivative will be included as a component of other investments, at fair value. See note 7.

The Company may, from time to time, enter into derivatives to manage its risk exposures (i) arising from the Company's investments in interest sensitive investments; and (ii) arising from the Company's facilitation of mortgage-backed trading. Derivatives entered into by the Company may include (i) foreign currency forward contracts; (ii) EuroDollar futures; (iii) purchase and sale agreements of TBAs; and (iv) other extended settlement trades.

TBAs are forward mortgage-backed securities whose collateral remain "to be announced" until just prior to the trade settlement. TBAs are accounted for as derivatives under FASB ASC 815 when either of the following conditions exists: (i) when settlement of the TBA trade is not expected to occur at the next regular settlement date (which is typically the next month) or (ii) a mechanism exists to settle the contract on a net basis. Otherwise, TBAs are recorded as a standard security trade. For 2014, all TBA transactions entered into by the Company have been accounted for as derivatives. The settlement of these transactions is not expected to have a material effect on the Company's financial statements.

In addition to TBAs, the Company may from time to time enter into other securities or loan trades which do not settle within the normal securities settlement period. In those cases, the purchase or sale of the security or loan is not recorded until the settlement date. However, from the trade date until the settlement date, the Company's interest in the security is accounted for as a derivative as either a forward purchase commitment or forward sale commitment.

Derivatives involve varying degrees of off-balance sheet risk, whereby changes in the level or volatility of interest rates or market values of the underlying financial instruments may result in changes in the value of a particular financial instrument in excess of its carrying amount. Depending on the Company's investment strategy, realized and unrealized gains and losses are

recognized in principal transactions and other income or in net trading in the Company's statement of operations on a trade date basis.

The Company does not offset the fair value of derivatives form the right to reclaim or the obligation to return collateral as allowed for in ASC 815.

#### F. Variable Interest Entities

FASB ASC 810, Consolidation ("FASB ASC 810") contains the guidance surrounding the definition of variable interest entities ("VIEs"), the definition of variable interests, and the consolidation rules surrounding VIEs. In general, VIEs are entities in which equity investors lack the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support. The Company has variable interests in VIEs through its investments in various securitization entities including CLOs and CDOs.

Once it is determined that the Company holds a variable interest in a VIE, FASB ASC 810 requires that the Company perform a qualitative analysis to determine (i) which entity has the power to direct the matters that most significantly impact the VIE's financial performance; and (ii) if the Company has the obligation to absorb the losses of the VIE that could potentially be significant to the VIE or the right to receive the benefits of the VIE that could potentially be significant to the VIE. The entity that has both of these characteristics is deemed to be the primary beneficiary and required to consolidate the VIE. This assessment must be done on an ongoing basis. See note 5.

#### G. Collateralized Securities Transactions

The Company may enter into transactions involving purchases of securities under agreements to resell ("reverse repurchase agreements") or "receivables under resale agreements") or sales of securities under agreements to repurchase ("repurchase agreements") which are treated as collateralized financing transactions and are recorded at their contracted resale or repurchase amounts plus accrued interest. The resulting interest income and expense are included in net trading in the statement of operations. See note 8.

In the case of reverse repurchase agreements, the Company generally takes possession of securities as collateral. Likewise, in the case of repurchase agreements, the Company is required to provide the counterparty with securities.

In certain cases a repurchase agreement and a reverse repurchase agreement may be entered into with the same counterparty. If certain requirements are met, the offsetting provisions included in FASB ASC 210, Balance Sheet ("FASB ASC 210"), allow (but do not require) the reporting entity to net the asset and liability on the statement of financial condition. It is the Company's policy to present the assets and liabilities on a gross basis even if the conditions described in offsetting provisions included in FASB ASC 210 are met.

The Company classifies reverse repurchase agreements as a separate line item within the assets section of the Company's statement of financial condition. The Company classifies repurchase agreements as a separate line item within the liabilities section of the Company's statement of financial condition.

In the case of reverse repurchase agreements, if the counterparty does not meet its contractual obligation to return securities used as collateral, or does not deposit additional securities or cash for margin when required, the Company may be exposed to the risk of reacquiring the securities or selling the securities at unfavorable market prices in order to satisfy its obligations to its customers or counterparties. The Company's policy to control this risk is monitoring the market value of securities pledged or used as collateral on a daily basis and requiring adjustments in the event of excess market exposure.

In the case of repurchase agreements, if the counterparty makes a margin call and the Company is unable or unwilling to meet the margin call, the counterparty can sell the securities to repay the obligation. The Company is at risk that the counterparty may sell the securities at unfavorable market prices and the Company may sustain significant loss. The Company controls this risk by monitoring its liquidity position to ensure it has sufficient cash or liquid securities to meet margin calls.

As of December 31, 2014, the fair value of collateral obtained by the Company related to reverse repurchase agreements was \$107,931. The fair value of collateral provided by the Company related to repurchase agreements of \$108,065.

In the normal course of doing business, the Company enters into reverse repurchase agreements that permit it to re-pledge or resell the securities to others.

#### H. Revenue Recognition

Net trading: Net trading includes: (i) all gains, losses, and income (interest and dividend) from securities classified as investments-trading and trading securities sold, not yet purchased; (ii) interest income and expense from collateralized securities transactions; and (iii) commissions and riskless trading profits. Riskless trades are transacted through the Company's proprietary account with a customer order in hand, resulting in little or no market risk to the Company. Transactions that settle in the regular way are recognized on a trade date basis. Extended settlement transactions are recognized on a settlement date basis. The investments classified as trading are carried at fair value. The determination of fair value is based on quoted market prices of an active exchange, independent broker market quotations, market price quotations from third party pricing services or, when independent broker quotations or market price quotations from third party pricing services are unavailable, valuation models prepared by the Company's management. The models include estimates, and the valuations derived from them could differ materially from amounts realizable in an open market exchange. Net trading is reduced by interest expense which is directly incurred to purchase income generating assets related to trading activities such as margin interest. Such interest expense is recorded on an accrual basis. See note 8.

New issue and advisory: New issue and advisory revenue includes: (i) origination fees for corporate debt issues originated by the Company; (ii) revenue from advisory services; and (iii) new issue revenue associated with arranging the issuance of and placing newly created debt, equity and hybrid financial instruments. New issue and advisory revenue is recognized when all services have been provided and payment is earned.

<u>Principal transactions and other income:</u> Principal transactions include all gains, losses, and income (interest and dividend) from financial instruments classified as other investments, at fair value in the statement of financial condition.

The investments classified as other investments, at fair value are carried at fair value. The determination of fair value is based on quoted market prices of an active exchange, independent broker market quotations, market price quotations from third party pricing services, or, when independent broker quotations or market price quotations from third party pricing services are unavailable, valuation models prepared by the Company's management. These models include estimates, and the valuations derived from them could differ materially from amounts realizable in an open market exchange.

Other income / (loss) includes interest earned on cash and cash equivalents, and other miscellaneous income. See note 8.

#### I. Leases

The Company is a tenant pursuant to several commercial office leases. All of the Company's leases are currently treated as operating leases. The Company records rent expense on a straight-line basis taking into account minimum rent escalations included in each lease. Any rent expense recorded in excess of amounts currently paid is recorded as deferred rent and included as a component of accounts payable and other liabilities in the statement of financial condition.

#### J. Recent Accounting Developments

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which replaces existing revenue recognition guidance in Topic 605, Revenue Recognition, replaces certain other industry-specific revenue recognition guidance, specifies the accounting for certain costs to obtain or fulfill a contract with a customer and provides recognition and measurement guidance in relation to sales of non-financial assets. The core principle of this ASU is to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU provides guidance on how to achieve this core principle, including how to

identify contracts with customers and separate performance obligations in the contract, how to determine and allocate the transaction price to such performance obligations and how to recognize revenue when a performance obligation has been satisfied. The ASU is effective for annual reporting periods, and interim periods within those reporting periods, beginning after December 15, 2016 with early adoption prohibited. The Company will be required to apply the amendments in this ASU using one of the following two methods: (i) retrospective to each prior reporting period presented with the option to elect certain practical expedients as defined within the ASU; or (ii) retrospective with the cumulative effect of initially applying the ASU recognized at the date of the initial application and providing certain additional disclosures as defined in the ASU. The Company will adopt the provisions of this ASU effective January 1, 2017 and is currently evaluating the new guidance to determine the impact it will have on its financial statements.

In June 2014, the FASB issued ASU No. 2014-11, Transfers and Servicing (Topic 860): Repurchase to Maturity Transactions, Repurchase Financings, and Disclosures, which changes the accounting for repurchase-to-maturity transactions that are repurchase agreements where the maturity of the security transferred as collateral matches the maturity of the repurchase agreement. According to the new guidance, all repurchase-to-maturity transactions will be accounted for as secured borrowing transactions in the same way as other repurchase agreements rather than as sales of a financial asset and forward commitment to repurchase. The amendments also change the accounting for repurchase financing arrangements, which are transactions involving the transfer of a financial asset to a counterparty executed contemporaneously with a reverse repurchase agreement with the same counterparty. Under the new guidance, all repurchase financings will now be accounted for separately, which will result in secured lending accounting for the reverse repurchase agreement. The guidance also requires new disclosures about transfers that are accounted for as sales in transactions that are economically similar to repurchase agreements and increased transparency about the types of collateral pledged in repurchase agreements and similar transactions accounted for as secured borrowings. The provisions of this ASU are effective for interim and annual periods beginning after December 15, 2014 with early adoption prohibited. An entity will be required to present changes in accounting for all outstanding repurchase-to-maturity transactions and repurchase financing arrangements as a cumulative effect adjustment to retained earnings as of the beginning of the period of adoption. The disclosures for certain transactions accounted for as a sale is required to be presented for interim and annual periods beginning after December 15, 2014, and the disclosure for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings is required to be presented for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. The Company will adopt the provisions of this ASU effective January 1, 2015 and is currently evaluating the new guidance to determine the impact it may have to its financial statements.

In August 2014, the FASB issued ASU No. 2014-13, Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity, which provides a measurement alternative for an entity that consolidates collateralized financing entities. A collateralized financing entity is a variable interest entity with nominal or no equity that holds financial assets and issues beneficial interests in those financial assets. The beneficial interests, which are financial liabilities of the collateralized financing entity, have contractual recourse only to the related assets of the collateralized financing entity. If elected, the alternative method results in the reporting entity measuring both the financial assets and financial liabilities of the collateralized financing entity using the more observable of the two fair value measurements, which effectively removes measurement differences between the financial assets and financial liabilities of the collateralized financing entity previously recorded as net income (loss) attributable to non-controlling and other beneficial interests and as an adjustment to appropriated retained earnings. The reporting entity continues to measure its own beneficial interests in the collateralized financing entity (other than those that represent compensation for services) at fair value. The ASU is effective for annual periods and interim periods with those annual periods beginning after December 15, 2015. A reporting entity may apply the ASU using a modified retrospective approach by recording a cumulative-effect adjustment to equity as of the beginning of the annual period of adoption. A reporting entity may also apply the ASU retrospectively to all relevant prior periods beginning with the annual period in which ASU No. 2009-17, Consolidation (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities, was adopted. Early adoption is permitted. The Company is currently evaluating the potential impact on its financial statements.

In November 2014, the FASB issued ASU No. 2014-17, Pushdown Accounting, which provides guidance on whether and at what threshold an acquired entity can apply pushdown accounting in its separate financial statements. The amendment gives the acquired entity the option of applying pushdown accounting in the reporting period in which the change-in-control event occurs. The decision to apply pushdown accounting is made for each individual change-in-control event. Once the election is made for a

particular event, it is irrevocable. Furthermore, an entity may elect to apply push down accounting in a period subsequent to the change-in-control event but must treat such application as a change in accounting principle and apply the guidance of Accounting Changes and Error Corrections (Topic 250). The amendment is effective on November 18, 2014. The Company is currently evaluating the potential impact on its financial statements.

#### K. Fair Value of Financial Instruments

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments. These determinations were based on available market information and appropriate valuation methodologies. Considerable judgment is required to interpret market data to develop the estimates and, therefore, these estimates may not necessarily be indicative of the amount the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

<u>Cash and cash equivalents</u>: Cash is carried at historical cost, which is assumed to approximate fair value. The estimated fair value measurement of cash and cash equivalents is classified within level 1 of the valuation hierarchy.

<u>Investments-trading</u>: These amounts are carried at fair value. The fair value is based on either quoted market prices of an active exchange, independent broker market quotations, market price quotations from third party pricing services, or valuation models when quotations are not available. See note 6 for disclosures about the categorization of the fair value measurements of investments-trading within the three level fair value hierarchy.

Other investments, at fair value: These amounts are carried at fair value. The fair value is based on quoted market prices of an active exchange, independent broker market quotations, or valuation models when quotations are not available. See note 6 for disclosures concerning the categorization of the fair value measurements of other investments, at fair value within the three level fair value hierarchy.

Receivables under resale agreements: Receivables under resale agreements are carried at their contracted resale price, have short-term maturities, and are re-priced frequently or bear market interest rates and, accordingly, these contracts are at amounts that approximate fair value. The estimated fair value measurements of receivables under resale agreements are based on observations of actual market activity and are generally classified within level 2 of the fair value hierarchy.

<u>Trading securities sold, not yet purchased</u>: These amounts are carried at fair value. The fair value is based on quoted market prices of an active exchange, independent market quotations, market price quotations from third party pricing services, or valuation models when quotations are not available. See note 6 for disclosures concerning the categorization of the fair value measurements of trading securities sold, not yet purchased within the three level fair value hierarchy.

Securities sold under agreement to repurchase: The liabilities for securities sold under agreement to repurchase are carried at their contracted repurchase price, have short-term maturities, and are repriced frequently with amounts normally due in one month or less and, accordingly, these contracts are at amounts that approximate fair value. The estimated fair value measurements of securities sold under agreement to repurchase are based on observations of actual market activity and are generally classified within level 2 of the fair value hierarchy.

<u>Derivatives</u>: These amounts are carried at fair value. Derivatives may be included as a component of investments-trading; trading securities sold, not yet purchased; and other investments, at fair value. See notes 9 and 10. The fair value is generally based on quoted market prices on an exchange that is deemed to be active for derivative instruments such as foreign currency forward contracts and Eurodollar futures. For derivative instruments, such as TBAs, the fair value is generally based on market price quotations from third party pricing services. See note 6 for disclosures concerning the categorization of the fair value measurements within the three level fair value hierarchy.

#### 4. RECEIVABLES FROM AND PAYABLES TO BROKERS, DEALERS, AND CLEARING AGENCIES

Amounts receivable and payable from brokers, dealers, and clearing agencies consist of the following as of December 31, 2014:

### RECEIVABLES FROM BROKERS, DEALERS AND CLEARING AGENCIES (Dollars in Thousands)

	December 31, 2014
Deposits with clearing organizations	\$ 750
Receivable from clearing organizations	240
Receivables from brokers, dealers and clearing agencies	\$ 990

### PAYABLES TO BROKERS, DEALERS AND CLEARING AGENCIES (Dollars in Thousands)

	December 31, 2014
Unsettled regular way trades, net	\$ 4,971
Margin payable	43,042
Payables to brokers, dealers and clearing agencies	\$ 48,013

Regular way securities transactions are recorded on a trade date, as if they had settled. The related amounts receivable and payable for unsettled securities transactions are recorded net in receivables from or payables to brokers, dealers, and clearing agencies on the Company's statement of financial condition. Effectively, all of the Company's trading assets and deposits with clearing organizations serve as collateral for the margin payable. See notes 5 and 8.

#### 5. FINANCIAL INSTRUMENTS

Investments-Trading

The following table provides a detail of the investments classified as investments-trading as of December 31, 2014:

### INVESTMENTS - TRADING (Dollars in Thousands)

	Decemb	ber 31, 2014
U.S. government agency MBS and CMOs (1)	\$	11,647
U.S. government agency debt securities		25,785

U.S. Treasury securities		1,131
CLOs		952
Other ABS		112
SBA loans		29,681
Corporate bonds and redeemable preferred stock		22,142
Municipal bonds		33,664
Certificates of deposit		985
Equity securities		291
Investments-trading	\$	126,748

#### (1) Includes TBAs. See note 7.

Trading Securities Sold, Not Yet Purchased

The following table provides detail of trading securities sold, not yet purchased as of December 31, 2014:

### TRADING SECURITIES SOLD, NOT YET PURCHASED (Dollars in Thousands)

	December 31, 2014			
U.S. government agency MBS (1)	\$ 1,666			
U.S. Treasury securities	15,644			
SBA loans	4			
Corporate bonds and redeemable preferred stock	31,406			
Municipal bonds	20			
Trading securities sold, not yet purchased	\$ 48,740			

(1) Includes TBAs. See note 7.

The Company may manage its exposure to changes in interest rates for the interest rate sensitive securities it holds by entering into offsetting short positions for similar fixed rate securities.

The Company included the change in unrealized gains in the amount of \$(772) in net trading revenue for the year ended December 31, 2014.

Other investments, at fair value

The following table provides detail of other investments, at fair value as of December 31, 2014:

### OTHER INVESTMENTS, AT FAIR VALUE (Dollars in Thousands)

December 31, 2014

As of December 31, 2014 and for the year ended December 31, 2014, all other investments, at fair value have been comprised of interests in CLOs. Each of the underlying CLOs are VIEs. The Company has determined it is not the primary beneficiary of the CLOs and therefore has not consolidated the CLOs. The Company has no other interest in these CLOs and has no guarantees explicit or implied. Therefore, the total exposure the Company has to these VIEs is the carrying value of the assets shown above. This represents the Company's maximum exposure to loss in non-consolidated VIEs.

The Company has treated these investments as available for sale investments. However, in each case, the Company has made the fair value election. Therefore, all gains and losses (both realized and unrealized) have been included in the statement of operations.

All but one of these investments represents an interest in the most junior tranche of the CLO. These investments do not have a stated yield or interest rate. Rather, the cash flows distributed represent the residual interest. The Company estimates the yield to maturity on these investments by projecting the underlying cash flows. The Company recognizes income based on this yield (which is adjusted each quarter based on the most current information available). The income is included as a component of principal transactions and other in the statement of operations. Any income recognized increases the cost basis of the investment. Each reporting period, the Company estimates the fair value of these investments (see note 6) and records an adjustment for the unrealized gain or loss which is also included in principal transactions and other income in the statement of operations. See note 8.

#### 6. FAIR VALUE DISCLOSURES

#### Fair Value Option

The Company has elected to account for certain of its other financial assets at fair value under the fair value option provisions of FASB ASC 825. The primary reason for electing the fair value option is to reduce the burden of monitoring the differences between the cost and the fair value of the Company's other investments, at fair value, including the assessment as to whether the declines are temporary in nature and to further remove an element of management judgment.

The changes in fair value (realized and unrealized gains and losses) of these instruments for which the Company has elected the fair value option are recorded in principal transactions and other income in the statement of operations. All of the investments for which the Company has elected the fair value option are included as a component of other investments, at fair value in the statement of financial condition. See note 5.

#### Fair Value Measurements

In accordance with FASB ASC 820, the Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three level fair value hierarchy. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the hierarchy under FASB ASC 820 are described below:

Level 1 Financial assets and liabilities whose values are based on unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 Financial assets and liabilities whose values are based on one or more of the following:

- 1. Quoted prices for similar assets or liabilities in active markets;
- 2. Quoted prices for identical or similar assets or liabilities in non-active markets;
- 3. Pricing models whose inputs, other than quoted prices, are observable for substantially the full term of the asset or liability; or
- 4. Pricing models whose inputs are derived principally from or corroborated by observable market data through correlation or other means for substantially the full term of the asset or liability.

Level 3 Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the asset or liability.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

Both observable and unobservable inputs may be used to determine the fair value of positions that the Company has classified within the level 3 category. As a result, the unrealized gains and losses for assets and liabilities within the level 3 category presented in the tables below may include changes in fair value that were attributable to both observable (e.g., changes in market interest rates) and unobservable (e.g., changes in unobservable long-dated volatilities) inputs.

A review of the fair value hierarchy classifications is conducted on an annual basis. Changes in the type of inputs may result in a reclassification for certain financial assets or liabilities. There were no transfers between any levels of the fair value hierarchy during the year ended December 31, 2014.

The following table presents information about the Company's assets and liabilities measured at fair value on a recurring basis as of December 31, 2014 and indicates the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value.

Total trading securities sold, not yet purchased	\$	48,740	\$	15,644	\$	33,096	\$ .	

- <u>U.S. Government Agency MBS and CMOs</u>: These are securities that are generally traded over-the-counter. The Company generally values these securities using third party quotations such as unadjusted broker-dealer quoted prices or market price quotations from third party pricing services. These valuations are based on a market approach. This is considered a level 2 valuation in the hierarchy. This category includes TBAs. See note 7.
- U.S. Government Agency Debt Securities: Callable and non-callable U.S. government agency debt securities are measured primarily based on quoted market prices obtained from third party pricing services. Non-callable U.S. government agency debt securities are generally classified within level 1 and callable U.S. government agency debt securities are classified within level 2 of the valuation hierarchy.
- <u>RMBS</u> and <u>CMBS</u>: The Company generally values these securities using third party quotations such as unadjusted broker-dealer quoted prices or market price quotations from third party pricing services. These valuations are based on a market approach. The Company generally classifies the fair value of these securities based on third party quotations within level 2 of the valuation hierarchy.
- <u>U.S. Treasury Securities</u>: U.S. Treasury securities include U.S. Treasury bonds and notes and the fair values of the U.S. Treasury securities are based on quoted prices in active markets. Valuation adjustments are not applied. The Company classifies the fair value of these securities within level 1 of the valuation hierarchy.
- CLOs, CDOs and ABS: CLOs, CDOs, and ABS are interests in securitizations. ABS may include, but are not limited to, securities backed by auto loans, credit card receivables, or student loans. Where the Company is able to obtain independent market quotations from at least two broker-dealers and where a price within the range of at least two broker-dealers is used or market price quotations from third party pricing services is used, these interests in securitizations will generally be classified as level 2 of the valuation hierarchy. These valuations are based on a market approach. The independent market quotations from broker-dealers are generally nonbinding. The Company seeks quotations from broker-dealers that historically have actively traded, monitored, issued, and been knowledgeable about the interests in securitizations. The Company generally believes that to the extent that it (1) receives two quotations in a similar range from broker-dealers knowledgeable about these interests in securitizations, and (2) believes the broker-dealers gather and utilize observable market information such as new issue activity in the primary market, trading activity in the secondary market, credit spreads versus historical levels, bid-ask spreads, and price consensus among market participants and sources, then classification as level 2 of the valuation hierarchy is appropriate. In the absence of two broker-dealer market quotations, a single broker-dealer market quotation may be used without corroboration of the quote in which case the Company generally classifies the fair value within level 3 of the valuation hierarchy.

If quotations are unavailable, prices observed by the Company for recently executed market transactions may be used or valuation models prepared by the Company's management may be used, which are based on an income approach. These models prepared by the Company's management include estimates and the valuations derived from them could differ materially from amounts realizable in an open market exchange. Each CLO and CDO position is evaluated independently taking into consideration available comparable market levels, underlying collateral performance and pricing, deal structures, and liquidity. Fair values based on internal valuation models prepared by the Company's management are generally classified within level 3 of the valuation hierarchy.

Establishing fair value is inherently subjective (given the volatile and sometimes illiquid markets for certain interests in securitizations) and requires management to make a number of assumptions, including assumptions about the future of interest rates, discount rates and the timing of cash flows. The assumptions the Company applies are specific to each security. Although the Company may rely on internal calculations to compute the fair value of certain interest in securitizations, the Company requests and considers indications of fair value from third party pricing services to assist in the valuation process.

SBA Loans: SBA loans include loans and SBA interest only strips. In the case of loans, the Company generally values these securities using third party quotations such as unadjusted broker-dealer quoted prices, internal valuation models using observable inputs, or market price quotations from third party pricing services. The Company generally classifies these investments within level

2 of the valuation hierarchy. These valuations are based on a market approach. SBA interest only strips do not trade in an active market with readily available prices. Accordingly, the Company generally uses valuation models to determine fair value and classifies the fair value of the SBA interest only strips within either level 2 or level 3 of the valuation hierarchy depending if the inputs to the model are observable or not.

Corporate Bonds, Redeemable Preferred Stock, and Foreign Government Bonds: The Company uses recently executed transactions or third party quotations from independent pricing services to arrive at the fair value of its investments in corporate bonds, redeemable preferred stock, and foreign government bonds. These valuations are based on a market approach. The Company generally classifies the fair value of these bonds within level 2 of the valuation hierarchy. In instances where the fair values of securities are based on quoted prices in active markets (for example with redeemable preferred stock), the Company classifies the fair value of these securities within level 1 of the valuation hierarchy.

Municipal Bonds: Municipal bonds, which include obligations of U.S. states, municipalities, and political subdivisions, primarily include bonds or notes issued by U.S. municipalities. The Company generally values these securities using third party quotations such as market price quotations from third party pricing services. The Company generally classifies the fair value of these bonds within level 2 of the valuation hierarchy. The valuations are based on a market approach. In instances where the Company is unable to obtain reliable market price quotations from third party pricing services, the Company will use its own internal valuation models. In these cases, the Company will classify such securities as level 3 within the hierarchy until it is able to obtain third party pricing.

Equity Securities: The fair value of equity securities that represent investments in publicly traded companies (common or preferred shares, options, warrants, and other equity investments) are determined using the closing price of the security as of the reporting date. These are securities which are traded on a recognized liquid exchange. This is considered a level 1 value in the valuation hierarchy.

In some cases, the Company has owned options or warrants in newly publicly traded companies when the option or warrant itself is not publicly traded. In those cases, the Company used an internal valuation model and classified the investment within level 3 of the valuation hierarchy. The non-exchange traded equity options and warrants were measured using the Black-Scholes model with key inputs impacting the valuation including the underlying security price, implied volatility, dividend yield, interest rate curve, strike price, and maturity date. Once the securities underlying the options or warrants (not the options or warrants themselves) have quoted prices available in an active market, the Company attributes a value to the warrants using the Black-Scholes model based on the respective price of the options or warrants and the quoted prices of the securities underlying the options or warrants and key observable inputs. In this case, the Company will generally classify the options or warrants as level 2 within the valuation hierarchy because the inputs to the valuation model are now observable. If the option or warrant itself begins to trade on a liquid exchange, the Company will discontinue using a valuation model and will begin to use the public exchange price at which point it will be classified as level 1 in the valuation hierarchy.

<u>Certificates of Deposit</u>: The fair value of certificates of deposit is estimated using valuations provided by third party pricing services. Certificates of deposit are generally categorized in level 2 of the valuation hierarchy.

#### **Derivatives**

**TBAs** 

The Company generally values these securities using third party quotations such as unadjusted broker-dealer quoted prices or market price quotations from third party pricing services. TBAs are generally classified within level 2 of the fair value hierarchy. If there is limited transaction activity or less transparency to observe market based inputs to valuation models, TBAs are classified in level 3 of the fair value hierarchy. U.S. government agency MBS and CMOs include TBAs. Unrealized gains on TBAs are included in investments-trading on the Company's statement of financial condition and unrealized losses on TBAs are included in trading securities sold, not yet purchased on the Company's statement of financial condition. See note 7.

#### Other Extended Settlement Trades

When the Company buys or sells a financial instrument that will not settle in the regular time frame, the Company will account for that purchase and sale on the settlement date rather than the trade date. In those cases, the Company accounts for the transaction between trade date and settlement date as a derivative (as either a purchase commitment or sale commitment). The Company will record an unrealized gain or unrealized loss on the derivative for the difference between the fair value of the underlying financial instrument as of the reporting date and the agreed upon transaction price. The Company will determine the fair value of the financial instrument using the methodologies described above.

#### Level 3 Financial Assets and Liabilities

Financial Instruments Measured at Fair Value on a Recurring Basis

The following table presents additional information about assets and liabilities measured at fair value on a recurring basis and for which the Company has utilized level 3 inputs to determine fair value.

### Level 3 Rollforward (Dollars in Thousands)

	2014	
Balance at January 1, 2014	\$	Figure 1 the property of a second sec
Purchases		25,155

			Duration		
			(years)	4.1	2.6 - 4.5
			Default rate	1.0%	1.0%

#### 7. DERIVATIVE FINANCIAL INSTRUMENTS

**TBAs** 

The Company enters into TBAs for two main reasons: (i) in order to assist clients (generally small to mid-size mortgage loan originators) in hedging the interest rate risk associated with the mortgages owned by these clients; and (ii) to hedge its own security portfolio. The Company carries the TBAs at fair value and includes them as a component of investments—trading or trading securities sold, not yet purchased in the Company's statement of financial condition. At December 31, 2014, the Company had open TBA sale agreements in the notional amount of \$318,463 and open TBA purchase agreements in the notional amount of \$318,463. Unrealized gain on TBAs of \$1,928 is included as a component of investments – trading and unrealized loss on TBAs of \$1,666 is included as a component of securities sold, not yet purchased in the statement of financial condition as of December 31, 2014.

#### Other Extended Settlement Trades

When the Company buys or sells a financial instrument that will not settle in the regular time frame, the Company will account for that purchase and sale on the settlement date rather than the trade date. In those cases, the Company accounts for the transaction between trade date and settlement date as a derivative as either a forward purchase commitment or a forward sale commitment. The Company will record an unrealized gain or unrealized loss on the derivative for the difference between the fair value of the underlying financial instrument as of the reporting date and the agreed upon transaction price. At December 31, 2014, the Company had open forward purchase commitments of \$3,517 and open forward sale commitments of \$0. Unrealized gain on other extended settlement trades of \$2 is included as a component of investments — trading and unrealized loss on extended settlement trades of \$4 is include as a component of securities sold, not yet purchased as of December 31, 2014.

#### 8. NET TRADING AND PRINCIPAL TRANSACTIONS AND OTHER INCOME.

The following table shows the components of net trading included in revenue in the statement of operations for the year ended December 31, 2014:

### NET TRADING (Dollars in Thousands)

	2014
Net realized gains / (losses) on investments-trading and securities sold, not yet purchased	\$ 25,311
Net unrealized gains / (losses) on investments-trading and securities sold, not yet purchased	(772)
Interest income on investments-trading, net of interest expense on trading securities sold, not yet purchased	3,248
Interest income on receivables under resale agreements, net of interest expense on securities sold under	
agreement to repurchase	495
Interest expense on margin payable	(447)
Other net trading	(192)
Net trading	\$ 27,643

The following table shows the components principal transactions and other income in the statement of operations for the year ended December 31, 2014:

### PRINCIPAL TRANSACTIONS AND OTHER INCOME (Dollars in Thousands)

Income accretion - CLOs Unrealized loss - CLOs (1,622) Realized loss - CLOs (78)		2014
Unrealized loss - CLOs  Papired loss - CLOs  (1,622)		_

Other income / (loss) is comprised of \$224 loss on the impairment of a cost method investment offset by \$26 of other miscellaneous income.

#### 9. OTHER ASSETS

Other assets consist of the following at December 31, 2014:

### Other Assets (Dollars in Thousands)

	December 31, 2014
Furniture, equipment, and leasehold improvements, net	\$ 343
Interest and other income receivable	990
Insurance proceeds receivable	277
Other miscellaneous receivables	28
Prepaid expenses and other miscellaneous assets	316
Other assets	\$ 1,954

## Furniture, Equipment, and Leasehold Improvements, Net (Dollars in Thousands)

<b></b>	December 31, 2014
Furniture and equipment	\$ 381
Leasehold improvements	135
	516
Accumulated depreciation	(173)
Furniture, equipment, and leasehold improvements, net	\$ 343

Furniture and equipment have an estimated useful life of 3 to 5 years. Leasehold improvements have an estimated useful life of 5 to 10 years.

#### 10. ACCOUNTS PAYABLE AND OTHER LIABILITIES

Accounts payable and other liabilities consist of accounts payable, accrued expense, and other liabilities incurred that are of a routine and short term nature.

#### 11. ACCRUED COMPENSATION

Accrued compensation consists of salary, commissions, and bonus expense incurred by the Company for services provided by the Company's employees.

#### 12. RETIREMENT PLAN

The Operating LLC maintains a 401(k) savings plan covering substantially all of its employees, including those working on the operations of the Company. During 2014, the Operating LLC matched 50% of employee contributions for all participants not to exceed 3% of their salary. Contributions made to the plan on behalf of the Company were \$209 for the year ended December 31, 2014.

#### 13. INCOME TAXES

The Company is treated as a pass-through entity for federal and state tax purposes and incurs no entity level taxes.

No federal or state taxes have been provided on profits of the Company since the member is individually liable for the taxes on its share of the Company's income or loss. In accordance with U.S. GAAP, the Company has defined the threshold for recognizing the benefits of tax return positions in the financial statements as "more likely than not" to be sustained by the applicable taxing authority and requires measurement of a tax position meeting the "more likely than not" threshold, based on the largest benefit that is more than 50 percent likely to be realized. Tax positions not deemed to meet the "more likely than not" threshold are recorded as a tax benefit or expense in the current year. As of and during the year ended December 31, 2014, the Company did not have a liability for any unrecognized tax amounts. However, management's conclusions concerning its determination of "more likely than not" tax positions may be subject to review and adjustment at a later date based on factors including, but not limited to, further implementation guidance and ongoing analyses of and changes to tax laws, regulations and interpretations thereof. If applicable, the Company recognizes interest accrued to unrecognized tax benefits in interest expense and penalties in other expenses on the statement of operations. During the year, the Company did not incur any interest or penalties.

#### 14. NET CAPITAL REQUIREMENT

The Company is subject to the net capital provision of Rule 15c3-1 under the Securities and Exchange Act of 1934, which requires the maintenance of minimum net capital, as defined. As applied to the Company, the rule requires net capital of \$267 as of December 31, 2014. As of December 31, 2014, the Company's net capital was \$12,750 which exceeds the minimum requirements by \$12,483.

#### 15. RESERVE REQUIREMENTS

As of December 31, 2014, the Company was not subject to the reserve requirements under Rule 15c3-3 of the Securities and Exchange Act of 1934 because it qualifies for an exemption under Rule 15c3-3(k)(2)(ii) as all customer transactions are cleared through Pershing, LLC on a fully disclosed basis. The Company does not carry securities accounts for its customers or perform custodial functions relating to customer securities and therefore has not included the schedules entitled "Computation for Determination of Reserve Requirements Under Rule 15c3-3" and "Information for Possession or Control Requirements Under Rule 15c3-3" in the supplementary information of this report.

#### 16. COMMITMENTS AND CONTINGENCIES

The Company has an agreement with Pershing, LLC and Newedge USA LLC whereby both companies act as clearing brokers for the Company. Under these agreements, the Company is required to maintain aggregate minimum deposits of \$750 under the contracts which is included as a component of receivables from brokers, dealers, and clearing agencies in the statement of financial condition.

#### Indemnifications

The Company with its clearing agent Pershing, LLC has a reciprocal indemnification agreement which holds the Company harmless against any losses, claims, liabilities or expenses including without limitation those asserted by its customers if any employee or agent of Pershing, LLC has acted improperly.

#### Contingencies

From time to time, the Company, may be named as a defendant in various legal actions, arbitration claims, and other litigation arising in connection with the conduct of its business activities.

In accordance with FASB ASC 450-20 (Loss Contingencies), the Company will accrue a liability when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. In many lawsuits and arbitrations, it is not possible to determine whether a liability has been incurred or to estimate the ultimate or minimum amount of that liability until the case is close to resolution, in which case no accrual is made until that time. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases in which claimants seek substantial or indeterminate damages, the Company cannot predict what the eventual loss or range of loss related to such matters will be. Subject to the foregoing, the Company continues to assess these cases and believes, based on information available to it, that the resolution of any open matters as of the date of this report will not have a material adverse effect on the financial condition of the Company.

#### Leases

The company incurred net rent expense of \$798 for the year ended December 31, 2014. The following table shows the future minimum lease commitments of the Company under operating leases. The table below does not include rent expense allocated from the Parent. Of the \$798 in rent expense recognized in 2014, \$101 was allocated from the Parent:

### FUTURE LEASE COMMITMENTS (Dollars in thousands)

		Lease	Sublease		Net Commitment
2015	\$	889	\$ (305)	\$	584
2016		216	_	•	216
2017		222			222

2019		224	-		224
2020 and Thereafter	07-117-000-0-0-0-0-0-0-0-0-0-0-0-0-0-0-0	249	-		249
	\$	2,018	\$ (305)	\$	1,713

#### 17. RELATED PARTY TRANSACTIONS

The Company has identified the following related party transactions for the year ended December 31, 2014. The transactions are listed by related party.

The Parent Company

The Company has entered into a service agreement with its Parent under which the Company receives certain personnel, infrastructure and administrative support, including office space, technology, systems, equipment and other services. The Company reimburses the Parent for such services. For the year ended December 31, 2014, the Company reimbursed the parent \$861 under this agreement. At December 31, 2014, the Company had \$619 payable to the Parent related to these services, which are included in due to Parent in the accompanying statement of financial condition. The Parent also made capital contributions of \$11,000 during the year ended December 31, 2014.

Other Entities

The Bancorp, Inc. ("TBBK") is identified as a related party because TBBK's Chairman is the Vice Chairman of the IFMI's Board of Directors and of the board of managers of the Operating LLC.

As part of the Company's routine operations, the Company from time to time purchases securities from third parties and sells those securities to TBBK. The Company may purchase securities from TBBK and ultimately sell those securities to third parties. The Company earned \$24 of net trading revenue from transactions with TBBK during 2014. The total market value of the underlying securities traded in the aforementioned transactions was \$3,644.

From time to time, the Company will enter into repurchase agreements with TBBK as its counterparty. As of December 31, 2014, the Company had a repurchase agreement in the amount of \$46,275 with TBBK as its counterparty. The fair value of the collateral provided to TBBK by the Company relating to these repurchase agreements was \$48,482 as of December 31, 2014. This is included as a component of securities sold under agreement to repurchase in the statement of financial condition. The Company incurred interest expense related to repurchase agreements with TBBK as its counterparty in the amount of \$461 for the year ended December 31, 2014, which was included as a component of net trading revenue in the Company's statement of operations.

#### 18. CONCENTRATION OF CREDIT RISK

As of December 31, 2014, the Company held all of its cash and cash equivalents with TD Bank. From time to time, the balances may exceed federally insured limits. If this institution fails under their obligation as custodian of these funds, the Company could lose all or a portion of its unrestricted cash balances.

The Company is engaged in various trading and brokerage activities in which counterparties primarily include broker dealers, banks, mortgage originators, and other financial institutions. In the event counterparties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the creditworthiness of the counterparty or issuer of the instrument. It is the Company's policy to review, as necessary, the credit standing of each counterparty. With respect to the Company's investments in securities, until these securities are sold or mature, the Company is exposed to credit risk relating to whether the issuer will meet its obligations when they come due.

Any default, bankruptcy, or reorganization of the Company's clearing brokers could have a substantial negative impact on the Company as the Company clears all trades through these entities. These entities hold the Company's securities account as well as accounts on behalf of all the Company's customers.

#### J.V.B. Financial Group, LLC (a wholly owned subsidiary of J.V.B. Financial Group Holdings, LP) SUPPLEMENTARY INFORMATION December 31, 2014 (Dollars in thousands)

### **Exemption Report for Fiscal Year Ended 2014** J.V.B. Financial Group, LLC

- J.V.B. Financial Group, LLC (the "Company") is a registered broker-dealer subject to Rule 17a-5 promulgated by the Securities and Exchange Commission (17 C.F.R. § 240.17a-5, "Reports to Be Made by Certain Brokers and Dealers"). This Exemption Report was prepared as required by 17 C.F.R. § 240.17a-5(d)(1) and (4), respectively. To the best of its knowledge and belief, for the fiscal year-ended 2014, the Company states the following:
- The Company claimed an exemption from 17 C.F.R. § 240.15c3-3 pursuant to paragraph (k)(2)(ii) (the "Identified Exemption") which provides, in relevant part:
  - (k) Exemptions
  - (2) The provisions of this rule shall not be applicable to a broker or dealer:
  - (ii) Who, as an introducing broker or dealer, clears all transactions with and for customers on a fully disclosed basis with a clearing broker or dealer, and who promptly transmits all customer funds and securities to the clearing broker or dealer which carries all of the accounts of such customers and maintains and preserves such books and records pertaining thereto pursuant to the requirements of §§ 240.17a-3 and 240.17a-4, as are customarily made and kept by a clearing broker or dealer.
- The Company has met the Identified Exemption provision in 17 C.F.R. § 240.15c3-3 (k) throughout the most recent fiscal year without exception.
- I, Douglas Listman, as the Chief Financial Officer of the Company, swear that to my best knowledge and belief, this Exemption Report is true and correct.

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Managers J.V.B. Financial Group, LLC

We have reviewed management's statements, included in the accompanying exemption report, in which J.V.B. Financial Group, LLC (a Delaware Limited Liability Company) (the "Company") identified the following provisions of 17 C.F.R. § 15c3-3(k) under which the Company claimed an exemption from 17 C.F.R. § 240.15c3-3: (2)(ii) (the "exemption provisions") and the Company stated that the Company met the identified exemption provisions throughout the most recent fiscal year without exception. The Company's management is responsible for compliance with the exemption provisions and its statements.

Our review was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and, accordingly, included inquiries and other required procedures to obtain evidence about the Company's compliance with the exemption provisions. A review is substantially less in scope than an examination, the objective of which is the expression of an opinion on management's statements. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to management's statements referred to above for them to be fairly stated, in all material respects, based on the provisions set forth in paragraph (k)(2)(ii) of Rule 15c3-3 under the Securities Exchange Act of 1934.

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Managers
J.V.B. Financial Group, LLC

In accordance with Rule 17a-5(e)(4) under the Securities Exchange Act of 1934, we have performed the procedures enumerated below with respect to the accompanying Schedule of Assessment and Payments ("General Assessment Reconciliation (Form SIPC-7)") to the Securities Investor Protection Corporation ("SIPC") for the year ended December 31, 2014, which were agreed to by J.V.B. Financial Group, LLC (the "Company") and the U.S. Securities and Exchange Commission, Financial Industry Regulatory Authority, Inc., and SIPC solely to assist you and the other specified parties in evaluating the Company's compliance with the applicable instructions of the General Assessment Reconciliation (Form SIPC-7). The Company's management is responsible for the Company's compliance with those requirements.

This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of those parties specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose. The procedures we performed and our findings are as follows:

- 1. Compared the listed assessment payments in Form SIPC-7 with respective cash disbursement records entries and cancelled checks, noting no differences.
- Compared the amounts reported on the audited Form X-17A-5 for the year ended December 31, 2014, as applicable, with the amounts reported in Form SIPC-7 for the year ended December 31, 2014, noting no differences.
- 3. Compared any adjustments reported in Form SIPC-7 with supporting schedules and working papers, noting no differences.
- 4. Proved the arithmetical accuracy of the calculations reflected in Form SIPC-7 and in the related schedules and working papers supporting the adjustments, noting no differences.

We were not engaged to and did not conduct an examination, the objective of which would be the expression of an opinion on compliance. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of the specified parties listed above and is not intended to be and should not be used by anyone other than these specified parties.
